Attention: Superintendents, Parents & Exhibitors

IOWA YOUTH CODE OF ETHICS

Youth are expected to be sincere, honest, and act in sportsmanlike ways at all times. Youth represent the entire program and their behavior reflects on their parents, leaders, club, and the entire youth program. All adults involved with the youth program, leaders as well as parents, are expected to set positive examples and serve as positive role models by what they say and do. Any youth who breaks the Code of Ethics or allows another person (adult or peer) to talk them into violating the Code of Ethics agrees to forfeit all prizes, awards, and premiums. The youth may also be prohibited from exhibiting at this and future exhibitions including the Iowa State Fair and other county, state or regional exhibitions.

Youth agree to follow these guidelines:

1. I will do my own work, appropriate for my age and physical and mental development. This includes research and writing of exhibit explanations, preparing exhibits (such as sewing, cooking, refinishing, etc.), care and grooming of animals, etc. Adult assistance should help guide and support me, not do it for me.
2. All exhibits will be a true representation of my work. Any attempt to take credit for other's work, alter the conformation of animals, or alter their performance is prohibited. Copyright violation or allowing others to complete your exhibit is considered misrepresentation and is prohibited.
3. I will treat all people and animals with respect. I will provide appropriate care for animals.
4. I will present exhibits that are safe for consumption. All food exhibits will be safe to exhibit and for judges to evaluate. Other exhibits will be safe for judges to evaluate and for exhibition.
5. All food animals that may be harvested immediately following the show shall be safe for consumers and shall have met all withdrawal times for all medications and be free of volatile drug residue.
6. If any animal requires medical treatment while at the fair or exhibition, only the Official State Fair Veterinarian may administer the treatment. All medications that are administered shall be done according to the label instructions of the medication used.
7. My animal's appearance or performance shall not be altered by any means, including medications, external applications, and surgical procedures. Any animal that is found to have changed its appearance or its performance shall be disqualified from the show, and have penalties assessed against the exhibitor, parent and/or guardian by the management of the fair or exhibition.
8. I will follow all ownership and possession rules and, if requested will provide the necessary documentation.
9. I will follow all livestock health requirements for this fair or exhibition, according to the state health requirements as printed in the Premium Book of the fair or exhibition. I will provide animal health certificates from a licensed veterinarian upon request from the management of the fair or exhibition.
10. By my entering an animal in this fair or exhibition, I am giving consent to the management of the fair or exhibition to obtain any specimens of urine, saliva, blood, or other substances from the animal to be used in testing. If the laboratory report on the analysis of any sample indicates a presence of forbidden drugs, this shall be evidence such substance has been administered to the animal either internally or externally. It is presumed that the sample tested by the laboratory to which it is sent is the one taken from the animal in question, its integrity is preserved and all procedures of said collection and preservation, transfer to the laboratory and analysis of the sample are correct and accurate and the report received from the laboratory pertains to the sample taken from the animal in question and correctly reflects the condition of the animal at the time the sample was taken, with the burden on the exhibitor, parent and/or guardian to prove otherwise.
11. I am responsible for my exhibit and I will not allow others to violate this Code on my behalf. By my entering an exhibit in this fair or exhibition I will accept any disciplinary action taken by management of this fair or exhibition for any violation of this Code of Ethics and any other rules of completion of the fair or exhibition without recourse against the fair or exhibition.
12. I want my exhibit to be an example of how to accept what life has to offer, both good and not so good, and how to live with and learn from the outcome.
13. I will not be involved in any illegal activities while participating in 4-H and FFA events, including but not limited to alcohol, tobacco or drug use.

I agree to conduct myself in an honest, ethical, and upstanding manner and I understand that disciplinary actions will result if these rules are violated. I understand that I am expected to represent the program in a positive manner. It is the intent that the 4-H'er take responsibility for caring for and grooming his/her own animals. 7. Mentors who are not working with a specific youth are available. They are willing to teach, answer questions and assist any family. They will be wearing wristbands during the week of fair.
8. **The mentor program ONLY applies to Grundy County. See State Fair Grooming Rules for exhibiting Livestock at the Iowa State Fair.**

DESIGN

Exploring the Elements and Principles in Home Decor

Elements of Design

The elements of design are line, color, shape, texture, form, and space. These are the tools used to design a room or space.

By learning and using the elements and principles of design, you will increase your understanding of how and why some things work together and some simply don't look right.

Line

Line is any mark greater in length than width. Words to describe line include vertical, horizontal, straight, curved, diagonal, thick, thin, dashed, zigzag, continuous, jagged, or smooth.

Color

Color is what we see when light is reflected. Words to describe color include hue (the name of the color), value (lightness or darkness of the color), or intensity (brightness or dullness of the color).

Shape

Shape is two-dimensional and appears flat. For example, a square is a shape. Words to describe shape include square, rectangle, circle, oval, triangle, curved, or wavy.

Texture

Texture is the surface quality of an item. It is how something feels—or appears like it would feel—when it is touched. Words to describe texture include rough, smooth, soft, prickly, squishy, grainy, or hard. The chair shown is leather. Leather looks and feels soft, smooth, slick, or cold.

Form

Form is the structure of an item; it is three-dimensional with length, width, and depth. For example, a box is a form. Words to describe form include cube, box, ball, cylinder, pyramid, free form, or sphere.

Space

Space is the area between and around an object and the area that the object occupies. In a room, you have a defined space, so it is important to consider how much of the space each object will use. For this reason, space is an added element in home décor. Words to describe space include cramped, crowded, open, uncomfortable, comfortable, cozy, noisy, warm, or cold.

Principles of Design

The principles of design are balance, emphasis, rhythm, unity, and proportion. The principles of design are how we use the elements of design to create the desired look.

Symmetrical

Balance

Balance means that both sides appear to be equal even if they are not identical. Formal or symmetrical balance means if you draw a line down the center, both sides are identical. Informal or asymmetrical balance means if you draw a line down the center, both sides appear to be equal in visual weight although not identical.

Asymmetrical

Emphasis

Emphasis draws your attention to a certain part of the room. For example, in the image below, the yellow chair draws your attention to the center of the room first.

Rhythm

Rhythm is a feeling of movement as it directs your eye around the room. It is achieved through the repetition of the design elements of shapes, forms, colors, textures, or lines.

Proportion

Proportion refers to the relationship of parts within an item. Scale compares size. Shown are two rocking chairs. All the parts—seat, back, legs, and spindles—are in proportion to each other. However, the big chair would not be the correct size or scale for a toddler, while the child's rocker would not work very well for an adult to use.

Unity

Unity is achieved when all the elements and principles work together as a whole to create a look or theme.

The purpose is to provide an opportunity for 4-H'ers to communicate, interact with, and teach an audience in an informal and experiential way.

1. Groups will be in 30 minutes sessions
2. 4-H'ers will not be allowed to check out any exhibits for use in working exhibits.
Please have a separate set of supplies for your working exhibit.
3. The 4-H'ers should be prepared to talk about any step of the process of what they are teaching.
4. 4-H'ers can only be selected for one working exhibit at the Iowa State Fair.
